DETAILED ACTION

1. Claims 1-3 and 5 are rejected under 35 U.S.C. 102(b or a) as being anticipated by Lazzarotti (b) or Gretener et al (a).

Both references teach (1) measuring a void on the main conveyor, (2) checking the availability of an equal or less sized article on the feed paths and (3) timely feeding any appropriately sized article into the void on the main path. Note that, when an article is moved from the feed path, a spacing is temporarily created or enlarged in front of the next upstream article in that feed path because the feed paths. Note column 5 lines 1-35 of Lazzarotti or column 3 line 55 to column 4 line 15 of Gretener et al. Dependent on the time lag in advancing the upstream articles on the feed paths and void frequency and size on the main conveyor, the systems of Lazzarotti or Gretener et al will inherently prevent feed from only one feed path.

2. Claims 1-3 and 5 are rejected under 35 U.S.C. 112, second paragraph, for being inaccurate. In the last four lines of claim 1, the "spacing is created... to prevent the articles from being successively cut out from only one auxiliary conveyance path" is not in agreement with the disclosure on page 14 lines 3-9 and the last four lines of the same page of applicant's specification.

3. Any inquiry concerning this communication should be directed to Joseph E. Valenza at telephone number (703) 308-2577. Amendments may be faxed to (703) 872-9306. My normal work week is Monday through Thursday.
